Fact Sheet – 31.12.2023

This is a marketing material. Please refer to the M/F prospectus and to the key information document before making any final investment decision.

Investment Objective

The Fund aims to achieve a return based on its investment policy, in the medium-term, which derives from investments in Undertakings for Collective Investment in Transferable Securities (UCITS) or other Undertakings for Collective Investments (UCI) funds which invest in bonds or equities.

Investment Policy

In order to achieve its investment objective, the Fund invests at least 65% of its net assets in equity, bond, and balanced UCITS/UCI, on average on a quarterly basis, which in turn invest in international financial markets. In the context of leveraging and/or hedging assets of the portfolio, the Fund may take long or short positions in derivative instruments, mainly on equities and bonds indices. The Fund's cash reserves are invested in fixed-term deposits and other related money market instruments. The management of the Fund is active and has the flexibility to not track the benchmark closely. Investments are conducted according to market conditions and the prevailing trends in the economy. For 2024, the Fund will be equally invested in equity and bond UCITS/UCI. The equity exposure is concentrated mainly in high dividend yield companies, in banks, technology and healthcare industry, in small caps and in the Japanese economy.

Investor Profile

The Fund is suitable for investors willing to maintain their investment for more than three years who seek capital appreciation through an internationally diversified balanced portfolio which invests in equity and bond UCITS and are willing to take a high-level investment risk.

Cumulative Returns vs Benchmark^{4,6}

Time Period	Mutual Fund	Benchmark	Active Return
