What is this product?

Type: Mutual Fund (hereafter «M/F») of Law 4099/2012

Term: The Fund has not a predetermined maturity. The Fund's dissolution may occur in case any of the conditions referred to in article 9 par. 1 of L.4099/2012 are met in accordance with the article 11 of the Fund's Regulation. The redemption of the MF's units is mandatory when requested by the unitholder.

Objective: The objective of the Fund is to achieve a return based on its investment policy, over the medium to long term, which derives through investments in a diversified conservative portfolio of bonds and equities of the domestic market. The Fund invests exclusively in stocks, corporate bonds, and/or Greek government bonds that are listed or traded on regulated markets or multilateral trading facilities operating in Greece. The Fund invests at least 10% of its net asset value in stocks and at least 10% of its net asset value in bonds. The maximum amount of investment in stocks or bonds is not allowed to exceed 65% of its net asset value. The Fund is actively managed, and the composition of its portfolio may differ from that of the benchmark. The benchmark is used for the purpose of comparing the performance of the Fund, which may deviate from the benchmark performance. The Fund may distribute annual dividend. For further information consult the prospectus.
Reference Benchmark: 65% Bloomberg Series - E Greece Govt All >1Year Bond Index & 35% Athex Composite Share Price Index

Intended retail investor type: The Fund mainly targets medium to long term investors seeking income and capital appreciation through a diversified conservative portfolio of bonds and stocks from the Greek market and who are willing to accept investment risk as described in the following section of this document.

Custodian: PIRAEUS BANK S.A.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk indicator
The summary risk indicator is a guide to the risk level of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have ranked the Fund as 3 out of 7, which rates the potential losses from future performances at a medium-low level, and adverse market conditions are unlikely to impact the Fund's ability to pay you.
This product does not include any protection from future market performance so you could lose some or all of your investment.
If the Fund cannot pay you what is owed, you could potentially lose your entire investment.

Risks that are substantially related to the Fund and are not taken into consideration by the summary risk indicator, are the following:
• Liquidity Risk: May arise from unfavourable market conditions and affects the Fund's ability to sell assets. The investor may receive an amount smaller than the calculated fair value when making a liquidation decision due to a possible reduction in the price of the unit in the interim, while he may not be able to redeem the units of the desired time. Also, under extreme liquidity conditions the net price of the unit may decrease significantly.
• Currency Risk: May arise from the changes in foreign exchange rates.
• Interest Rate Risk: May arise from the changes in interest rates.
• Inflation Risk: May arise from the inflationary trends that occur in the economy.
• Counterparty Risk: The risk of failing to settle a transaction on financial instruments due to the counterparty's non-payment or inability to deliver securities on time.
• Risk spreading: May arise from the limited dispersion of assets. This risk is reduced by the limits set for investing in the same issuer. With these limits, a greater dispersion is being achieved.
• Risk of asset reduction: May arise from the reduction of the Fund's assets due to the redemption of its units.
• Operational Risk: It is related to human errors, inadequate processes and weaknesses in the company's systems, or external factors.
• Custodian Risk: The risk of losing assets due to acts or omissions by the Custodian or even due to fraud in case the Custodian or any third party who has been entrusted with custody of the Fund's assets proves to be insolvent.

What are the risks and what could I get in return?

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years **Investment example:** 10.000 EUR

Performance scenarios		1 year	3 years (Recommended holding period)
Minimum	There is no minimum guaranteed return.		
Stress scenario	What you might get back after costs	6,410€	6,950€
	Average return each year	-35.9 %	-11.4 %
Unfavourable scenario	What you might get back after costs	7,940€	8,520€
	Average return each year	-20.6 %	-5.2 %
Moderate scenario	What you might get back after costs	11,020€	13,090€
	Average return each year	10.2 %	9.4 %
Favourable scenario	What you might get back after costs	14,300€	17,960€
	Average return each year	43.0 %	21.5 %

The figures shown include all the costs of the product itself , but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.The stress scenario shows what you could lose at extreme market conditions. The unfavourable scenario occurred for an investment between September 2021 - September 2022 (if you redeem after 1 year) and between September 2019 - September 2022 (if you redeem after 3 years). The moderate scenario occurred for an investment between September 2020 - September 2021 (if you redeem after 1 year) and between August 2017 - August 2020 (if you redeem after 3 years). The favourable scenario occurred for an investment between January 2017 - January 2018 (if you redeem after 1 year) and between October 2016 - October 2019 (if you redeem after 3 years).

What happens if the fund is unable to payout?

The investor may face a financial loss (equal to a part or the entire investment) in the event of default of the Mutual Fund. Such a potential loss is not covered by any guarantee fund. In this context, there is a potential default risk if the assets of the Mutual Fund held by the Custodian are lost. The Custodian is liable to the Mutual Fund or to the investors of the Mutual Fund in the event of loss by the Custodian or one of its representatives of the financial products held by the Custodian, unless the Custodian can prove that the loss has arisen because of an external event beyond its reasonable control and the consequences would be unavoidable despite its reasonable efforts to the contrary. In all other cases, the Custodian is liable in the event of its negligent or intentional failure to properly fulfill its obligations pursuant to L. 4099/2012 and the UCITS Directive 2009/65/EU as well as any applicable legislative and regulatory framework governing Mutual Funds.

What are the costs?

The person who provides you investment advice on this product or sells it to you, may charge you an additional cost that is not included in the expenses mentioned herein.If this happens, this person will inform you about this cost and how your investment is affected.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year you would get back the amount that you invested(0% annual term). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10.000 EUR is invested.

Investment EUR 10 000 scenarios	If you exit after 1 year	If you exit after 3 years (Recommended holding period)
Total costs	329€	880€
Annual cost impact (*)	3.3 %	2.8 %

(*) This illustrates how costs reduce your return each year over the holding period. For example,it shows that if you exit at recommended holding period, your average return per year is projected to be 12.2% before costs and9.4% after costs.

What are the costs?

Composition of costs:

One-off costs upon entry or exit		
Entry costs	1.10% of the amount you pay in when entering this investment. This is the maximum amount you pay.	110 €
Exit costs	0.00% of your investment before it is paid out to you.	0 €
Ongoing costs taken each year		
Transaction costs	0.25 % of the value of your investment per year. This is an estimate of our cost when we buy and sell the underlying investments for the product. The actual amount will vary depending on the quantity we buy or sell.	25 €
Management fees and other administrative or operating costs	1.97% of the value of your investment per year. This is an estimate based on actual costs over the last year.	197 €
Additional costs taken under specific conditions		
Performance fees	The impact of performance fees. It amounts to 20% on any positive difference between the return of the M/F and the return of the Benchmark, before deducting the performance fee on an annual basis, while it is also calculated in periods of negative performance e.g. the M/F has outperformed the benchmark while having negative performance. 0.00% of the value of your investment per year. The aggregated cost estimation includes the average over the last 5 years. The actual amount will vary depending on how well your investment performs. Further information about the performance fees is available in the product's prospectus. Reference Benchmark: 65% Bloomberg Series - E Greece Govt All >1Year Bond Index & 35% Athex Composite Share Price Index	0 €

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

The minimum recommended holding period, given the Mutual Fund's investments nature and its objective for a return achievement, is 3 years. In most cases, added value will be generated over a medium to long term period.

Investors may request daily (working days in Greece) the redemption of their units before the recommended holding period. The investor is not charged with redemption costs.

How can I complain?

If you wish to file a complaint with respect to the Mutual Fund, or Optima asset management MFMC or the Mutual Fund's distributors or the person that offers advise with respect to the Mutual Fund, you may submit your complaint via post or e-mail. Complaints can be submitted in writing: 330 Olympionikon & Venizelou, 15451, N.Psychiko, Athens, Greece, E-mail address: info@optimaaedak.gr.
